

Dutch Farmer Speaks 2022/07/29

A screenshot of a YouTube video player. The video shows a man with short brown hair and a mustache, wearing a red bandana with white stripes and a black t-shirt. He is standing in front of a green tree and some bushes. In the background, several dark-colored cows are grazing in a field. The YouTube interface includes a search bar at the top, a 'SIGN IN' button, and various control buttons like play, pause, and volume. Below the video, there is a transcript window. The transcript starts with "on to that" at 0:52 and "good afternoon ladies and gentlemen this" at 0:54. The video has 570,600 views and was posted on July 29, 2022.

Transcript:

0:00

hello everyone recently i posted a

0:02

conversation i had

0:04

with michael yan an esteemed author and

0:07

combat correspondent on the populist

0:10

uprisings the farmers uprisings the

0:12

truckers uprisings the yellow jackets

0:14

and so forth in europe and the potential

0:17

spread of what's

0:19

called so nicely by the u n foods

0:21

insecurity across the world michael had

0:24

spent some time with the dutch farmers

0:26

as well who haven't been represented

0:28

well i would say in the legacy media for

0:31

reasons that aren't exactly clear

0:34

we he reached out to a dutch farmer

0:36

jeroen van maanen

0:39

to provide a first-hand account of the

0:41

matter and to discuss the dutch farmers

0:44

concerns and we thought it would be very

0:46

useful to bring that to you in the

0:49

context of this broader discussion

0:51

so

0:52

on to that

0:54

good afternoon ladies and gentlemen this

0:56

is uh

0:57

i'm a dairy farmer from

0:59

zerolder

1:01

a city in the middle of the netherlands

1:03

someone asked me if i could

1:06

send a message what's going on in

1:08

holland what's all about these farmer

1:10

protests and why are dutch farmers angry

1:14

well the farmer protests are already

1:16

here since uh

1:17

two and a half years the first of

1:19

october 2019 was the first time dutch

1:22

farmers had a very big protest

1:24

we all went to the egg

1:27

and actually there was more like some

1:29

protests

1:30

about the wind which was blowing already

1:33

probably for 30 years that somewhere

1:35

there's a problem in the environment

1:37

there's a problem with pollution

1:39

agriculture sector gets pointed at as a

1:42

main cause of all problems

1:46

after that after the biggest protest

1:49

nitrogen problems came up and nitrogen

1:51

problems aren't new 30 years ago already

1:56

nature people start talking about

1:58

nitrogen pollution

2:00

which would make the rain sour and all

2:03

the sour rain

2:05

would cause lots of damage to the nature

2:07

parks to forest

2:09

and when you would hear these voices

2:12

all the nature would be gone in a few

2:14

years

2:15

well thirty years later nature's still

2:17

there most of it is in excellent

2:19

condition

2:20

for two and a half years people start

2:22

talking about nitrogen emission ammonia

2:25

from agriculture sector

2:28

there's also

2:30

nitrogen pollution because of the

2:32

traffic because of the industry

2:34

nitrogen oxides

2:36

but we don't talk about it a lot and

2:39

when the nitrogen problem is cold in

2:41

holland it's focusing uh most of the

2:43

times

2:44

on the agriculture sector only

2:48

well

2:49

when the thing started

2:51

and actually what i wanted to do is

2:52

reducing the nitrogen emission and

2:55

especially the nigerian deposition on

2:57

nature parks

3:00

well it started agriculture sector came

3:02

together all parties like the the dairy

3:05

industry pork industry chicken industry

3:08

you could ever call whatever industries

3:10

came together made a big plan

3:13

there was a lot of solutions in it

3:15

and we tried to to solve the problem

3:18

our government in the meanwhile we

3:21

went on with making other plans

3:23

which resulted in uh

3:26

the latest new plan a few weeks ago

3:28

and it's uh terrible it's idiot and it's

3:31

and it's of no use

3:34

what they did is they divided holland in

3:37

different regions

3:39

some regions have to lower their

3:40

emissions by 12

3:42

some regions have to lower their

3:43

emissions by 46.

3:45

75 or 95 percent

3:48

in the meanwhile our juridical system is

3:53

this on this moment that no innovations

3:55

in agriculture sector are allowed to use

3:58

so there are different techniques for uh

4:01

lowering your omission but when you are

4:06

asked for a court and a judge will look

4:09

into your innovations they will say you

4:11

can't use it so the only reason the only

4:14

thing

4:15

to

4:16

lower your emissions right now is just

4:19

cutting your heart back

4:21

and actually you're probably coming

4:24

at the main cause of it all

4:27

stick uh nitrogen is more like we call

4:30

it stick to beat the dog

4:32

it's just to camouflage the real cars

4:35

some left-wing parties in holland and

4:37

probably all over the world it's it's

4:39

the same movement they want to get rid

4:40

of

4:41

animal industries they want to have a

4:43

transition to more plant-based food

4:46

transition to

4:48

vegetarians we have all the all the

4:51

older stuff together

4:53

in ireland we also have a party like

4:55

that and they asked for 50 reduction of

4:58

our national herd that's probably on

5:00

this moment the main cause of it all

5:02

we're not talking about nitrogen no they

5:05

just want to reduce the national earth

5:08

well every farmer all around the world

5:09

and also every citizen knows

5:12

that cutting back the hood isn't the

5:14

cause of the of any problems you know we

5:16

are producing food

5:18

two-thirds of agricultural land on the

5:20

planet can only be grown by grass and

5:23

you need

5:24

cows like this

5:26

for making grass into meat or into milk

5:28

or whatever you want

5:30

whatever problem with emissions with

5:32

pollution on the world you are asking

5:35

about whether it's not chemical

5:37

but farming is probably a part of the

5:40

problem but most of it all it's

5:43

part of the solution

5:45

well dutch farmers now are getting

5:48

angry every day more government is not

5:50

listening

5:52

and what we are fearing for is we have

5:54

to leave our land and that's also

5:57

a deeper agenda behind it

5:59

in holland they just want to have

6:01

farmers land 62 percent of the

6:04

area in holland is farmed by farmers

6:08

and what they want to do is they want to

6:10

have the land cheap so they're making it

6:11

nature

6:12

first

6:13

and when they have the land in their

6:15

hands they can build houses on it houses

6:17

we don't need by

6:19

dutch citizens

6:21

because average dutch couple is getting

6:23

1.8 1.9 kids so what's the problem of

6:27

the

6:28

demand for houses that we get 100 000

6:31

refugees refugees in the in this country

6:34

every year

6:35

that's why they have to build houses

6:37

well that's a shortcut of

6:39

of our problems right now

6:41

farmers are getting angry they're not

6:43

listened by by the government

6:45

every solution we

6:47

came on with

6:49

they don't take it

6:50

and what we see right now when we have

6:52

to reduce our national hurt when we have

6:54

to reduce our herds by ourselves farms

6:57

will break down on this moment when the

6:59

plan of the government is coming

7:01

probably 30 40 50 of the farmers have to

7:04

fear for the future that's why we're on

7:06

the streets that's why we're protesting

7:08

that's why the protesters are going

7:10

harder

7:11

and

7:12

actually quite happily

7:14

all around the world people start

7:16

looking at holland what's happening

7:17

there

7:18

well what uh what the warning from the

7:20

dutch farmers is that every citizen from

7:23

holland especially but also in europe

7:25

probably around the globe

7:27

have to look at what do we want to have

7:29

to eat in the in a few years time dutch

7:32

agriculture is champion world champion

7:35

on every class whether we talk about

7:36

nitrogen where we talk about other

7:39

pollutions

7:40

dutch farming is best in all chapters

7:43

so it's no solution to

7:46

get rid of dutch farmers the production

7:48

which is uh

7:50

going away up here needs to come back in

7:52

enough in another different area from

7:54

the world

7:55

well we need transport for that it gives

7:57

co2 emissions

8:00

and also the standards of production up

8:01

there

8:02

aren't as high as as in dutch

8:04

agriculture so that's why we're fighting

8:06

on the street we want to stay on our

8:08

land

8:10

when we are part of a problem we want to

8:12

solve it we can do it we always did it

8:14

nitrogen pollution and nitrogen

8:16

emissions

8:18

turned back 68 by agriculture sector in

8:20

holland in the last 30 years so we

8:23

proved we can do a lot of things but we

8:26

will keep on farming we will fight for

8:28

our farms

8:29

that's why we

8:31

have the actions we have the protest on

8:33

the on the on the in the country

8:36

we're asking a lot of attention for our

8:38

problems

8:40

this is uh in ireland we call it a

8:43

farmer's handkerchief and it's made a

8:44

symbol of the of the battle of the

8:46

farmers right now

8:48

and actually

8:50

it feels good that

8:52

foreign people asking for what's

8:53

happening in holland and we're warning

8:55

you all over europe

8:56

this problem which is here in holland

8:58

can be your problem in the next years so

9:01

we're asking for support from farmers

9:03

and also citizens in europe all around

9:05

the world

9:07

this problem could be your problem when

9:09

citizens want to have

9:11

food on the on the plate in the next 10

9:13

years

9:14

that we have to stand up for our farmers

9:17

dutch farmers are standing up

9:19

we are supporting all farmers around the

9:21

world

9:22

keep on doing what we do and we have to

9:25

start fighting for our farms for our

9:26

future for our families and for food and

9:29

table thanks very much

Description Section:

Michael Yon, esteemed author and combat correspondent, reached out to Jeroen van Maanen, a Dutch dairy farmer and protest leader for 2.5 years, to provide a first-hand account of the Dutch farmer uprising that the mainstream media has not represented very well.
